Siemens Vietnam dates back to 1979 and today, Siemens is the market and innovation leader in the fields of power and gas, energy management, power generation services, mobility, building technologies, digital factory, process and drives as well as healthcare. The competencies of Siemens in electrification, automation and digitalization support Vietnam to build up its basic infrastructure and to turn the mega cities like Hanoi and Ho Chi Minh City into world class cities. Together with our customers, we are proud to make lives of the Vietnamese people better and cities more livable. We make real what matters.

Siemens Healthcare Vietnam dates back to 1991 and since its first presence on Vietnam’s healthcare market in 1991, Siemens Healthineers has quickly self-affirmed our leading position in supplying premium medical equipments and comprehensive medical solutions to hospitals and healthcare centers across Vietnam. We bring here a diversified spectrum of high-tech medical equipments, including imaging systems for diagnosis, therapy equipments for cancer treatment, laboratory diagnosis and hearing instruments. In addition, we provide a wide array of IT solutions that optimize workflow, increase efficiency and reduce costs in hospitals and clinics.

In May 2016, Siemens Healthcare unveiled its new brand name Siemens Healthineers. The new brand underlines Siemens Healthcare’s pioneering spirit and its engineering expertise in the healthcare industry. With a new level of agility, we are eager to develop into a more versatile, long-term partner for our customers. Now is our time to inspire the future of healthcare globally and in Vietnam!

At Siemens, we are on a constant search for bright and innovative minds to fill our ranks. If you are a fast learner, creative, able to work with multi-cultural and multi-discipline teams and have a strong desire to be a winner, we dare you to test your limits with Siemens Engineering Graduate Program (EGP)

**What is EGP?**

The Engineering Graduate Program (EGP) is an 18-month program designed for prospective engineers who desire to develop their career with Siemens Healthineers. With three rotations of 6 months each, the EGP will provide you opportunities that take you beyond engineering. You will be given the chance to take on business and engineering challenges, project assignments and an
assignment abroad in one of our ASEAN countries. The EGP program will commence on 20 March 2017 covering:
• On the job experience
• Off the job training
• Personal mentor
• One assignment abroad

How are you qualified for this post?
• Possess at least a Bachelors Degree in Engineering or Biomedical Engineering or Medical/Pharmacy Engineering, with at least Good degree Classification (minimum 2nd Class Upper or magna cum laude).
• Be independent, resourceful, and able to work with stakeholders from a diverse culture and background.
• Be an excellent communicator who is able to articulate ideas and resolve engineering issues.
• Be fluent in English language and preferably one other ASEAN-Pacific language to communicate with our ASEAN Pacific counterparts.
• Be proficient in Microsoft Office applications
• No prior experience is required for this opportunity.

What else do you need to know?
As Siemens receives a competitive number of applicants daily, we would wish to respond to all inquiries but this may not always be possible. Hence, only shortlisted candidates will be contacted and in this case they will be invited for two rounds of assessments.

To realize your opportunities at Siemens Healthineers, please contact:
